Alessandro Giannini

giannini.alessandro.2003@gmail.com

Professional Profile

Motivated Control and Computer Engineering student with international work experience in hospitality supervision and a strong interest in computer science, automation, and control engineering. I enjoy combining software and hardware to build practical systems, with a particular focus on intelligent automation and computer vision applications.

Education

Sapienza University of Rome — Rome, Italy
B.Sc. in Computer and Control Engineering, Control track — 2023–2026

- Bachelor's thesis: *Detection of Zero-Dynamics Attacks through Actuator Rescaling* (*Rilevazione di Zero-Dynamics Attacks tramite Riscalamento degli Attuatori*).

Liceo Scientifico Paolo Ruffini — Viterbo, Italy
Scientific High School Diploma — 2022

Work Experience

IMonelli Restaurant — Dublin, Ireland
Supervisor — Aug 2022–Aug 2023

- Supervised daily restaurant operations in a dynamic international environment.
- Coordinated team activities and supported staff to maintain service quality and efficiency.
- Assisted with customer service, problem solving, and operational organization during busy shifts.
- Strengthened communication, leadership, and responsibility through hands-on supervisory experience.

Projects

Computer Vision Laser Pointer Tracking System

- Designed and developed a personal project involving a laser pointer capable of continuously targeting an object recognized by a camera using OpenCV for object detection.
- Combined software logic, object detection, and automated actuation, utilizing an **Arduino** to control the servo motors, to create a functional tracking prototype.
- Developed the project as an exploration of automation, control, and intelligent visual tracking.

Skills

- **Technical Skills:** C/C++, Python, MATLAB, Simulink, Arduino, Automation and Control Fundamentals.
- **Soft Skills:** Problem solving, Team coordination, Customer-facing communication, International work environment adaptability.
